

Capability Statement

"Simplified Technologies for Endless Possibilities"

Core Competencies:

Clear Synergy Technologies provides data-focused systems integration services to meet our clients' needs for business process improvement and information engineering. This approach treats data as a corporate resource in a shared data environment to ensure that quality information is available to users throughout the enterprise wherever and whenever it is needed. Our expertise with this data-focused approach has yielded lasting solutions that:

- Promote the integration of activities within business processes that enable faster, cheaper, and more precise product delivery to customers.
- Support the seamless flow of information throughout the enterprise to enable effective decisions in response to ever changing requirements.
- Facilitate information exchanges across organizational boundaries to enable coordinated management control of operations, including utilizing migration of appropriate resource to cloud platforms, and ease of access.
- Apply proven system development and methodology principles to our customer management process for a requirements-through-support approach that delivers within the client's time and budget expectations.
- Provide models that yield valuable detailed insight and analysis on data patterns and trends in an easily digestible manner across various mediums.
- Are built to consume real-time raw data mined from data lakes and provide time-based scenarios off them.

Current & Past Experience:

Our experience has come from working together with various Government Institutions and multi-national corporations and consulting firms.
